About the Cover

The windmills on the cover are located between Harlowtown and Judith Gap, two Montana towns. The United States is dotted with these clean power alternative marvels. Windmills like these provide power to many homes across the nation. The companies that operate them pro-actively create relationships with producers to encourage stewardship of the land.

AGRICULTURAL EXPORTS 84

COMMENTS FROM OUR GOVERNOR

Farming and ranching have become more diverse enterprises in Montana. Although wheat and beef still account for about three-fourths of the state's agricultural receipts, crops such as peas and lentils are gaining significance and more farmers are interested in diversifying their operations.

Wind energy has become a major new source of income in rural areas. Montana had just 1 megawatt of wind power online in January 2005. By July 2010, wind capacity had risen to 386 megawatts, with more than 50 projects in permitting, construction or operation.

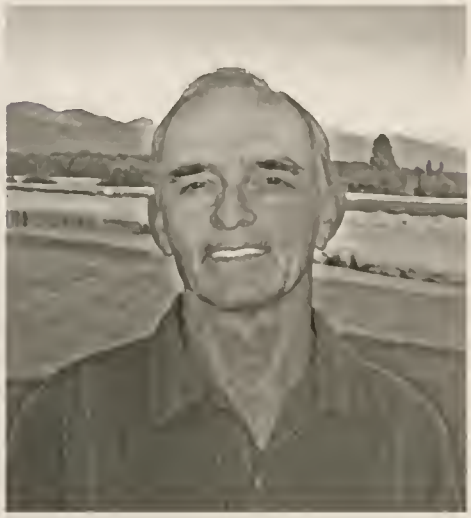
In 2009, the Montana total of agricultural cash receipts was slightly more than $2.6 billion. While it's unclear if we can beat that record total in 2010, it is clear that agriculture is a driving force in Montana, and that agriculture and energy are two of the reasons this state has remained strong in the face of a nationwide recession.

Our producers continue to innovate to add value to their products, expanding Montana's agriculture. If you have ideas about business opportunities for Montana, use the comment form on our website, www.governor.mt.gov or give my office a call at 444-3111.

Sincerely,

Brian Schweitzer, Governor

MESSAGE FROM THE DIRECTOR



This is an exciting time in Montana's agricultural development. We are moving forward to increase efficiency and production of both traditional crops and rotation crops to discourage pests and reduce the need for energy-intensive fertilizer applications. We are working to restore infrastructure to allow Montanans to provide more fresh food for our schools, institutions and customers who desire local food.

As the 2010 harvest moved toward completion, it appeared Montana will lead the nation in production of lentils and Austrian winter peas. New buyers and processors and new crop rotations have brought increased opportunities in lentils, peas and other pulse crops.

The annual Montana Agricultural Statistics bulletin is a cooperative effort between the state and the National Agricultural Statistics Service, providing county-by county data on the previous year's production of crops and livestock. The bulletin and updates are available electronically at www.nass.usda.gov/mt.

Sincerely,

Ron de Yong

Ron de Yong, Director, Montana Department of Agriculture

NOTES FROM THE DIRECTOR

The United States Department of Agriculture has teamed with the Montana Department of Agriculture to prepare the 47th edition of basic agricultural information about Montana. The data contained in the 2010 Montana Agricultural Statistics bulletin are essential to those who market and wish to make educated decisions about Montana's agricultural bounty.

The National Agricultural Statistics Service provides timely, accurate and useful statistics in service to U.S. agriculture. One of the guiding principles in accomplishing this mission is the promise of confidentiality. Referencing Title 7 of the U.S Code, NASS will not disclose individual information to the public and shall be immune from mandatory disclosure of any type, including legal process. NASS will not compromise the trust of the farmers and ranchers who provide the personal information which is summarized within this publication.

I would like to thank the farmers, ranchers, and agribusinesses who take the time from busy schedules to provide survey information. I would also like to thank commodity organizations like the Montana Wheat and Barley Committee, which supplies funding for several data series within this publication that would not be possible otherwise. Finally, thank you to the employees in the Montana Field Office and the National Association of State Departments of Agriculture who dedicate themselves to provide service to Montana agriculture.

Steve Anderson

Steve Anderson, Director, USDA, NASS, Montana Field Office

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Ron de Yong, (406) 444-3144
Central Services Administrator: Libbi H. Lovshin
Attorney: Cort Jensen
Public Information Officer: Ron Zellar

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

Agricultural Development Division

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

Ag Marketing & Business Development Bureau
- Marketing and Business Assistance
- Grants and Loans
- Agriculture Curriculum Development

Wheat & Barley Bureau, Great Falls
- Producer funded research and marketing
- Hosts foreign buyers and delegations

Rural Development Bureau
- Agricultural Finance
- Agricultural Statistics
- Commodity Check-off Programs
- State Hail Insurance

State Grain Laboratory, Great Falls
- Tests grain for quality

Food and Agriculture Development Centers assisted 100 clients with regional food and farm-derived energy projects in FY 2010, helping to create or retain 150 employment positions.

Growth Through Agriculture grants and loans during FY 2010 totaled more than $1.1 million to 42 businesses and individuals for value-added agriculture projects.

Marketing assistance during FY 2010 included 46 one-on-one company consultations; $803,000 in trade show sales; and 28 promotions in out of state trade shows.

Rural Development finance programs have a combined loan portfolio of more than $3.5 million.

State Hail Insurance insured 1,910,623 acres in 2010, down slightly from the previous year's record 2 million acres.

State Grain Laboratory completed nearly 25,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 2000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

Agricultural Sciences Division

Administrator: Greg Ames, (406) 444-2944

Analytical Laboratory Bureau, Bozeman
- Tests feed, pesticides, fertilizer, water

Commodity Services Bureau
- Anhydrous Ammonia
- Feed/ Fertilizer
- Grain Warehouses & Auditing
- Organic Certification
- Produce/ Seed/ Seed Potatoes

Pest Management Bureau
- Apiary/ Alfalfa Leaf Cutter Bees
- Export Certification
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Nursery/ Quarantine
- Cooperative Ag Pest Survey

Technical Services Bureau
- Groundwater
- Licensing and Registration
- Pesticides
- Special Pesticide Registrations
- Vertebrate Pests

The Department:

- Licenses 451 pesticide dealers and registers 10,361 pesticide products.
- Licenses 6,598 private and 2,011 commercial and government pesticide applicators.
- Certifies 74 commercial honeybee operations and registers 5,200 apiary locations.
- Issues 750 plant health and export certificates, enabling products to be shipped to other states and countries. Licenses 976 nurseries to assure quality products.
- Issues 3,000 inspection certificates on 252 million pounds of potatoes shipped for seed.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 125,500 individual test results annually on 3,200 feed, fertilizer, soil, plant tissue and water quality samples.

Pesticide Disposal program assists homeowners, businesses and producers in disposing of unwanted and unusable pesticides - a total of 289,666 pounds since 1994.

Fertilizer program registered 3,232 fertilizer and soil amending products and licensed 212 in-state and 224 out-of-state businesses in 2010. Reports indicate 620,800 tons of fertilizer were distributed in Montana during 2009.

Organic program annually inspects and certifies 107 farms and ranches and 35 food handlers as compliant with USDA organic standards. Organic certification allows access to local, national and international value-added markets for organic food products.

Noxious Weed Trust Fund annually distributes $2.8 million in grants for weed management, research and education from automobile license weed management fund, federal grants and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

The department receives advice from, and has attached to it, the following:

- Agriculture Development Council
- Alfalfa Seed Committee
- Cherry Advisory Committee
- Hail Insurance Board
- Mint Committee
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee

Crop, Livestock, and Weather Digest, 2009

January: Temperatures were above normal for the month with below normal precipitation. High temperatures were mostly in the 50s and 60s. St. Marie had the low of minus 38 degrees. Snow cover on winter wheat fields declined from December, but wind, freeze, and drought damage was minimal. At month's end, winter wheat conditions were 68 percent good to excellent, compared to 32 percent last year. Ninety-four percent of cattle and calves and ninety-five percent of sheep and lambs received supplemental feed. Calving and lambing had just begun.

February: Most of Montana received below normal moisture during February. Swan Lake had the most monthly accumulated precipitation at 2.59 inches. Temperatures were mostly above normal. Grass Range, Roundup, and Hardin reached the high of 64 degrees, and Wisdom had the low of minus 19. At the end of the month, winter wheat conditions were 59 percent good to excellent, ahead of last year's 35 percent. Calving and lambing were 20 percent and 9 percent complete, respectively. The number of livestock receiving supplemental feed remained high at month's end, nearly the same as last month.

March: Montana had moderate precipitation during March. High temperatures ranged from the 40s to the 70s. Scobey had the low of minus 33 degrees. At month's end, topsoil moisture conditions were 85 percent adequate to surplus, well above last year's 30 percent. Subsoil moisture conditions were 74 percent adequate to surplus, compared to last year's 24 percent. Winter wheat conditions were 56% good to excellent at the end of the month. Calving and lambing were 52 percent and 30 percent complete, respectively. Most livestock continued to receive supplemental feed.

April: Montana received sporadic snowstorms the first week and rain the third week. High temperatures around the state ranged from the 40s and 50s during the first part of the month to the 70s and 80s the last part. At month's end, topsoil and subsoil moisture conditions continued to be significantly ahead of last year. Winter wheat crop conditions were 64 percent good to excellent. Wet fields and cooler temperatures slowed down spring grains planting. By the end of the month, calving and lambing were 85 percent and 70 percent complete, respectively.

May: During the week ending May 3rd, a major spring snow storm across much of the state resulted in over 4,000 livestock deaths in Carter and Powder River counties. Warm, dry weather mid-month allowed farmers back into the fields for spring planting. Small grains were nearly all 90 percent or more seeded by the end of the month. Winter wheat crop conditions were 60 percent good to excellent. Range and pasture feed conditions were ahead of last year and the five-year average. Seventy-four percent of cattle and calves and sixty percent of sheep and lambs had been moved to summer ranges at month's end.

June: Montana had light to moderate precipitation during the month. Warm summer temperatures prevailed. At the end of the month, winter wheat crop conditions were 49 percent good to excellent, with 84 percent of the crop headed. Spring grains were in good to excellent condition. The first cutting of hay was in full swing. Ranchers had moved all cattle and sheep to summer pastures by month's end.

July: At the beginning of the month, the weather was hot and dry. Rain fell across the state the second and third weeks. Farmers started to harvest winter wheat at month's end. Several spring crops were near harvest. The first cutting of hay was almost complete. Pastures in many areas of the state received little precipitation at the end of the month and were drying out. Range and pasture feed conditions were behind last year and the five-year average.

August: The state had above average temperatures and heavy rainfall in many areas the first week. Wet fields and cooler temperatures the second week continued to delay harvest. Hot, dry conditions the rest of the month allowed producers back into the fields. At the end of the month, winter wheat harvest was 86 percent complete. Harvest of most small grains was well behind normal. Durum wheat was 15 percent harvested by month's end, compared to last year's 69 percent and the five-year average of 58 percent. Range and pasture feed conditions were 35 percent good to excellent.

September: Temperatures were above normal and precipitation was limited for most of the month. On September 30, Central and Southwest Montana set several new records for precipitation, including snowfall. Winter wheat harvest was wrapped up by mid-month. Small grains harvest and the second cutting of hay were nearing completion at month's end. Sugar beet crop conditions were 79 percent excellent to good and harvest was underway. Winter wheat seeding was 69 percent complete. By the end of the month, ranchers had moved 43 percent of livestock from summer ranges.

October: Montana received moderate precipitation much of October. High temperatures ranged from the 50s to the 70s. Cooler temperatures and moisture delayed the completion of durum wheat harvest until the end of the month. Sugar beet harvest was 65 percent complete, behind last year's 80 percent and the five-year average of 85 percent. Winter wheat seeding was nearly finished at month's end. Eighty-four percent of cattle and calves and ninety percent of sheep and lambs were moved from summer pastures.

November: The state had light to moderate precipitation and above normal temperatures during November. Huntley and Valentine tied for the high temperature at 78 degrees. At the end of the month, corn harvested for grain was 67 percent complete, ahead of last year's 56 percent. Winter wheat conditions were 48 percent good to excellent, compared to 67 percent the previous year. Ranchers had moved most livestock from summer ranges by month's end.

December: Montana received above normal moisture for December. West Glacier received the most monthly accumulated precipitation at 3.73 inches. Temperatures were below normal, with highs mostly in the 40s and 50s and lows ranging from negative 40 to negative teens. At month's end, winter wheat crop conditions were 34 percent good to excellent, behind last year's 75 percent. Due to cold weather and heavy snowfall, 85 percent of cattle and calves and 90 percent of sheep and lambs received supplemental feed at the end of the month.

1/ Farms are places that had or would have had annual sales of agricultural products of $1,000 or more.

2008 Organic Production Survey

Montana has 173 certified or exempt organic farms utilizing 284,482 acres. Of the 284,482 organic acres, 167,800 acres are cropland, 91,218 acres were harvested, and 116,682 acres were pastureland. Montana leads the U.S. in organic production for dry peas, durum wheat, and spring wheat.

These and other interesting facts can be found in the complete Organic Production Survey publication at www.agcensus.usda.gov/Publications/2007/Online_Highlights/Organics/.

Organic Field Crops Harvested from Certified and Exempt Organic Farms, 2008

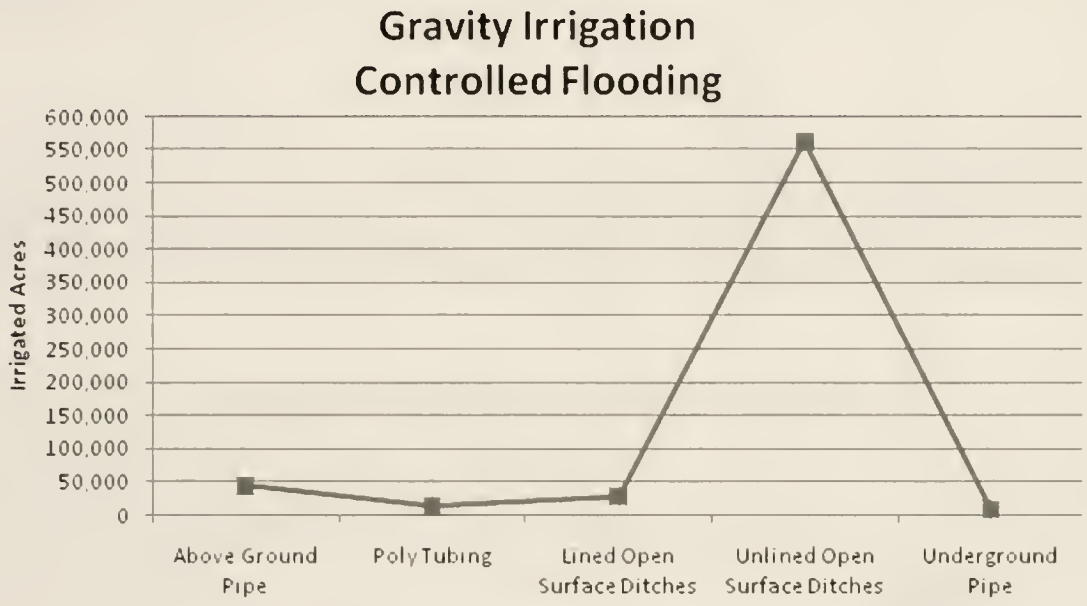
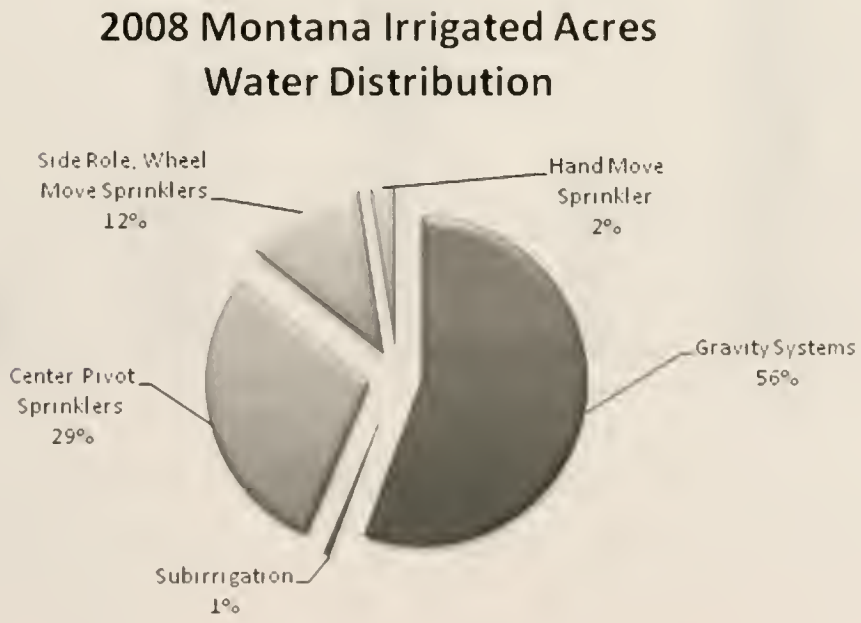
2008 Farm & Ranch Irrigation Survey (FRIS)

Montana has 8,507 farms using some type of irrigation. Those farms irrigated 1,947,159 acres. Of those irrigated acres, 1,810,942 acres were cropland, with 1,549,574 harvested acres, and 256,328 acres were pastureland.

Looking a little deeper, Montana has 830,781 irrigated acres using water from on-farm sources. Irrigated acreage using water from off-farms sources was 1,071,787 acres. Using the acre-foot per acre measurement (one acre-foot covers one acre one foot deep), average water usage per acre for all water sources is 1.4 ac-ft. Average water usage per acre for sprinkle systems is 1.2 ac-ft, and the average using gravity is 1.4 ac-ft. Montana has 401 irrigation wells with an average well depth of 214 feet.

These and other interesting facts can be found in the complete Farm and Ranch Irrigation Survey (FRIS) publication at **www.agcensus.usda.gov/Publications/2007/Online_Highlights/Farm_and_Ranch_Irrigation_Survey/**.





Agriculture Remains Montana's Number One Industry in 2009

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, assuming Mining and Gas and Oil remained consistent with the previous two years. The 2009 value of crop production decreased to $1.6 billion, a drop of $133 million or 8 percent below 2008. The value of livestock decreased in 2009 to $1.0 billion, a drop of $177 million from 2008. Net government payments decreased 28 percent in 2009 to $55.4 million, down $21.6 million from 2008.

We were unable to obtain 2009 data for the Mining and Gas and Oil sectors before the book went to print. When comparing major industrial sectors in Montana, receipts were lower than a year ago. Agriculture showed a 9 percent decrease, down $312.7 million from 2008. Non-residential Travel showed a 32 percent decrease in 2009, down $739.6 million from 2008. Wood and Paper Products decreased 23 percent or $161.6 million below 2008.

Selected Montana Industries Comparison

Industry	2007	2008	2009	2009/2008

1/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

2/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. -- Not available.

Hogs and Pigs Annual Farrowings and Disposition

Year	Annual Farrowings 1/			In Shipments	Marketings 2/	On Farm Slaughter 3/	Death Losses
	Sows Farrowed	Pigs per Litter	Pig Crop				
	Head						
2000	33,500	9.07	304,000	20,000	311,000	2,000	11,000
2001	38,000	9.11	346,000	15,000	331,000	2,000	13,000
2002	36,000	9.11	328,000	23,000	332,000	2,000	12,000
2003	37,000	9.14	338,000	18,000	343,400	2,000	15,600
2004	32,500	9.57	311,000	18,000	318,500	2,000	13,500
2005	33,000	9.67	319,000	18,000	312,100	2,000	12,900
2006	34,000	9.56	325,000	18,000	316,300	2,000	19,700
2007	33,500	10.06	337,000	11,000	327,800	2,000	18,200
2008	37,000	10.16	376,000	29,000	382,800	2,000	20,200
2009	42,500	10.14	431,000	11,000	421,000	1,900	19,100

1/ Annual farrowing refers to the December-November marketing year. 2/ Marketings include animals custom slaughtered in commercial establishments for use on farms where produced. 3/ On farm slaughter excludes animals custom slaughtered in commercial establishments for farmers.

Hogs and Pigs Production and Income

Year	Production 1/	Marketings 2/	Price per Cwt	Cash Receipts 3/	Value of Home Consumption	Gross Income
	(000) Lbs		Dollars	(000) Dollars		
2000	70,090	72,680	39.80	29,945	414	30,359
2001	71,426	71,835	43.60	32,317	445	32,762
2002	68,190	71,275	35.90	26,566	352	26,918
2003	69,245	73,584	39.70	30,173	381	30,554
2004	69,889	73,755	52.30	38,880	502	39,382
2005	74,857	76,811	53.10	41,209	531	41,740
2006	74,653	77,563	47.90	37,819	479	38,298
2007	78,312	79,992	47.90	39,192	479	39,671
2008	80,119	86,558	47.10	42,834	490	43,324
2009	78,601	80,750	40.90	36,502	391	36,893

1/ Production has adjustments made for inshipments and changes in inventory. 2/ Marketings exclude interfarm sales and custom slaughter in commercial establishments for use on farms where produced. 3/ Cash receipts from marketings and sale of farm slaughter.

Chickens Inventory, Value, Production, and Income, December 1

Year	All Chickens	Number Sold	Number Lost	Value per Bird	Total Value	Production Sold	Price per Pound	Cash Receipts

Montana Agricultural Exports Decreased $329 million in 2009

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2009, totaled $928.7 million, $328.8 million below 2008. Wheat and Products remained Montana's leading export, making up 60 percent of the state's agricultural exports. Feeds and Fodders were the second leading export accounting for 19.7 percent of the total. Vegetables and Preparations which includes dry beans, dry peas, lentils, and fall potatoes was in third place with 7.7 percent and the Feed Grains and Products category came in fourth with 6.9 percent of total Montana exports.

Montana agricultural commodity exports were mostly lower in 2009. Wheat and Products showed the largest change in value down $332 million. Feeds and Fodders exports increased $29.9 million from 2008 but Feed Grains and Products were down $20.9 million. Vegetables and Preparations decreased $4.4 million, while Seeds increased $1.6 million. Live Animals and Meat decreased $1.4 million from 2008.

Montana maintained third place among states exporting Wheat and Products for fiscal year 2009. The top wheat exporting states for 2009 were Kansas, followed by North Dakota, Montana, Washington, Minnesota, South Dakota, Ohio, Colorado, California and Texas. Considering exports of all products, California remained first, followed by Iowa, Illinois, Nebraska, Texas, Kansas, Minnesota, North Dakota, Indiana and Washington. Montana was unchanged from the previous fiscal year with twenty-eighth place in 2009 for exports of all products.

U.S. agricultural exports in fiscal 2009 totaled $96.6 billion, which is $18.7 billion lower than fiscal 2008. The export value for Wheat and Products is 42 percent below 2008 at $8.6 billion. Exports showed decreases in most categories with exceptions in Vegetables and Preparations and Seeds. The largest decreases in U.S. exports occurred in Dairy, followed by Wheat and Products and Cottonseed.

Soybeans and Products remained the largest valued agricultural export commodity in 2009 at $17.7 billion—despite a decrease of $1.6 billion from fiscal 2008.
